DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al. (U.S. 4,401,303) in view of Luedke et al. (U.S. 6,110,079). Anderson teaches a sparring apparatus including sensors on a striking target resembling a portion of human form attached to a rotating mechanism, further including a motor. Anderson fails to specifically discloses sensors for detecting blows to the target. Luedke teaches the desirability of providing wireless sensors for detecting blows. In view of the teachings of Luedke it would have been obvious to provide sensors as taught by Luedke to the sparring device of Anderson in order to allow for blow detection. Specific limitations drawn to the sensors, motor, and control systems are considered matters of obvious choice well within the realm of one with ordinary skill in the art absent unexpected or undesired results.
